CHITRANSH SRIVASTAVA

Cybersecurity Enthusiast | Vulnerability Assessment, Threat Detection & Cloud Security

+91-8318160228 | chitranshcsk2005@gmail.com | linkedin.com/in/chitranshsrivastava | github.com/chitranshcsk2005-ctrl | Noida, Uttar Pradesh, India

OBJECTIVE

B.Tech Computer Science student (CGPA: 8.40) with hands-on experience in vulnerability assessment, penetration testing and Python-based threat detection, seeking to build industry-ready skills in cybersecurity and AI. Certified in network security, social engineering defense and DFIR, with 10+ credentials across security, cloud and data platforms. 500+ LeetCode problems solved, contest rating 1550+.

EDUCATION

GL Bajaj Institute of Technology and Management, Noida, India *Sep 2024 – Feb 2028 (Expected)*
B.Tech – Computer Science, CGPA: 8.40

Bal Vidya Bhawan Public School, Uttar Pradesh, India *2023*
Intermediate (Class XII)

Bal Vidya Bhawan Public School, Uttar Pradesh, India *2021*
High School (Class X)

RELEVANT EXPERIENCE

SkillCraft Technology — Cyber Security Intern *Nov 2025 – Dec 2025*
Remote

- Conducted vulnerability assessments and penetration testing across 8+ web and network systems, identifying weaknesses in application logic, access controls and configurations.
- Identified 15+ security flaws (including XSS and misconfigured access controls) and reduced exploitable risk by ~30% through remediation and automated Python-based threat detection and log analysis.

CodSoft — Artificial Intelligence Intern *Jan 2026 – Feb 2026*
Remote

- Built AI/ML solutions (chatbot, recommendation system, image classifier) using Python, scikit-learn, and TensorFlow across 3 end-to-end pipelines (EDA to deployment), improving model accuracy by 12% through hyperparameter tuning and feature engineering.
- Skills in classification, feature engineering and model evaluation transferable to AI-driven threat detection and anomaly analysis.

PROJECTS

Password Strength Checker *Python, 2025*

- Evaluated password strength using NIST guidelines and regex-based rule analysis, providing real-time feedback to improve user awareness of brute-force and dictionary attack vulnerabilities.

Caesar Cipher Encryption Tool *Python, 2025*

- Built a CLI tool (argparse, string module) for encrypting/decrypting text via Caesar Cipher with configurable shift keys, modular code, and input validation; demonstrated substitution cipher mechanics and brute-force attack vectors.

Smart Poultry Farm Monitoring System *IoT / NodeMCU ESP8266*

- Developed an IoT-based system using NodeMCU ESP8266 to monitor farm environmental conditions in real time, applying embedded programming and sensor-based monitoring skills.

Women Safety Tracking System (Concept) *IoT / Location Tracking*

- Designed a concept system for location tracking and emergency assistance, building practical skills in IoT, programming, and problem-solving.

TECHNICAL SKILLS

Cybersecurity: Vulnerability Assessment, Penetration Testing, Threat Intelligence, DFIR, Access Control Review, Phishing & Social Engineering Defense, Application & Browser Security, Encryption, Network Security
Security Tools: Wireshark, Scapy, X-Force Exchange
Cloud & Infrastructure: OCI, OCI Multicloud, Virtual Cloud Networks, MySQL, Oracle DB, VPN, Linux (RHEL)
Languages: Python, C, C++, SQL, Bash, HTML, CSS
AI/ML & Data: TensorFlow, scikit-learn, Keras, NLTK, Pandas, NumPy, Reinforcement Learning, Git
Other Tools: Flask, Jupyter Notebook, VS Code

CERTIFICATIONS & ACHIEVEMENTS

- Certified Network Security Practitioner (CNSP); Certified Social Engineering Defense Practitioner (CSEDP); DFIR Foundations and Techniques
- TryHackMe Pre Security — 7 modules, 31 labs; Red Hat RH104, RH124 (System Administration I), RH134 (System Administration II, Ver. 10)
- Oracle AI Database Certified Foundations Associate; OCI Foundations Associate (2025); OCI Multicloud Architect Professional (2025)
- Microsoft Certified: Fabric Data Engineer Associate (DP-700)
- AMD AI Reinforcement Learning Hackathon & Workshops, IIT Delhi (Feb 14–15, 2026) — Team of 5
- LeetCode: 500+ problems solved, Contest Rating 1550+ | GitHub: github.com/chitranshcsk2005-ctrl
